EDUCATION	Electrical Engineering & Computer Science Sep 2024 - Present University of California, Berkeley - Current GPA: 3.957/4.00 - Expected Graduation: May 2028	High School Diploma (Valedictorian) Sep 2021 - June 2024 San Francisco High School of the Arts GPA: 4.00/4.00
TECHNICAL EXPERIENCE	CalSol - UC Berkeley Solar Vehicle Team Sep 2024 - Present Electrical Co-Program Manager (Jun 2025 – Present), Project Lead (Dec 2024 – May 2025), Team Member (Sep 2024 – Dec 2024) - Coordinated multiple electrical projects and provided technical management for 9+ initiatives and 30+ members, Conducted schematic/layout reviews for projects - Led the design of BMS after analyzing and improving the previous generation, implementing ISO-SPI communication, CAN bus integration, and ESP32-UART. - Designed a hardware/firmware onboarding lab for new members and provided technical guidance. - Tested and compared NGM and WaveSculpter motor controllers, delivering insights that guided motor controller selection. Theoretical & Applied Fluid Dynamics Laboratory Aug 2025 - Present Role/Title: Electronics Team Researcher - Redesigned and optimized the autonomous sailboat's electrical system for environmental monitoring, including a custom BMS and integration of voltage regulators, RTC, current monitors, and other modules into unified PCB designs. - Re-laid out a complex 4-layer sensor-interface board to improve signal integrity, reliability, and overall system organization. - Facilitated the transition from ESP32 to STM32, updating hardware interfaces and supporting early firmware migration for greater flexibility and functionality. Undergraduate Research Apprenticeship Program Oct 2024 - Mar 2025 Role/Title: Research Apprentice - Focused on developing a communication system for an exoskeleton project, involving web app, dataserver, and Raspberry Pi integration. - Contributed to the design and testing of a multi-layer communication stack, ensuring data transmission across all components. Cambridge Centre for International Research (CCIR) July 2023 - Feb 2024 Role/Title: Researcher - Designed a passion project to monitor environmental indicators (CO2, humidity, UV) around an orchid pot, displaying data on an alphanumeric display with knowledge in electrical engineering and coding	
VOLUNTEER/ LEADERSHIP	Student Maker Space Electronics Admin Aug 2025 - Present - Delivered hands-on trainings for student makers, teaching safe and effective use of multimeters, oscilloscopes, soldering equipment, power supplies etc. - Provided mandatory safety orientations and guided students through makerspace access procedures to ensure proper lab conduct and equipment handling. National Honor Society at HSArts Sep 2023 - June 2024 Role/Title: President - Organized donations to support dance performances and community events. - Arranged and performed Chinese dance in various communities, including senior centers and middle schools.
